

Todd Froisland

Senior Full Stack Software Engineer • Technical Founder

St. Johns, AZ • (801) 928-4236 • Toddfroisland@gmail.com • LinkedIn • GitHub • hipdeck.co

SUMMARY

Senior software engineer with experience building enterprise retail software, production SaaS platforms, payment systems, and cloud infrastructure. Strong background in architecture, APIs, authentication, real-time systems, and product ownership.

TECHNICAL HIGHLIGHTS

- Multi-tenant SaaS Architecture
- React • TypeScript • Node.js
- MySQL • Redis • WebSockets
- AWS • DigitalOcean • CI/CD
- Stripe • Stripe Terminal • Clover
- Shopify POS • PCI Compliance
- Drupal • Sanity CMS
- Auth0 • OAuth 2.0
- AI Integrations & APIs

SELECTED IMPACT

- Built HipDeck from concept to production.
- Contributed to software saving ~\$2M annually.
- Designed enterprise POS and payment systems.
- Built real-time cloud synchronization infrastructure.

PROFESSIONAL EXPERIENCE

Purple Innovation — Software Engineer III (2022–Present)

Architected a vertically integrated POS platform replacing Shopify POS. Built React/TypeScript/Node.js applications, integrated Stripe, Stripe Terminal, Clover APIs and hardware, contributed to Purple.com (Drupal), and established CI/CD practices while helping deliver approximately \$2M in annual operational savings.

HipDeck — Founder & Software Engineer (2021–Present)

Designed and built a multi-tenant SaaS platform including authentication, asset management, scheduling, AI-assisted features, WebSockets, Redis, cloud infrastructure, payment integrations, and white-label architecture.

Solle Naturals — Full Stack Software Engineer

Improved onboarding resulting in ~15% downstream revenue growth while developing commerce tooling and checkout improvements.

Bluehost — Software Engineer Intern

Built React components for the Bluebird design system and maintained strong automated test coverage.

SecurityMetrics — PCI Compliance Support Agent

Guided merchants through PCI DSS Self-Assessment Questionnaires, explained payment security requirements, and developed practical knowledge of PCI compliance and payment ecosystems.

PROJECTS

Vendanza — Built ETL pipelines and analytics dashboards integrating Shopify, Amazon, and other commerce platforms.

EDUCATION

Brigham Young University

B.S. Computer Science

Minor in Business Management
